

# Wilmington Weather Station

## Mission Statement

To operate a community weather station that provides professional, timely, accurate weather and climate change information for the Wilmington community and invites public participation.

## Purpose

1. To operate and maintain a community weather station that includes public participation.
2. To establish and support a student internship program that provides an opportunity for students to learn future career skills in meteorology.
3. To establish an adult volunteer participation program to support our community weather station.
4. To provide professional, scientific and quality weather, climate change, atmospheric and astronomy information.
5. To support community based science weather, climate change, atmospheric and astronomy research projects.
6. To share information with the community to prepare for significant weather changes.
7. To share information for community emergency preparedness during natural disasters and industrial accidents.
8. To participate in community events and share our information and resources.
9. To network with other community weather stations and organizations.
10. To network with governmental agencies involved in weather, climate change, atmospheric and astronomy research.
